EXPERIENCE

Product Manager & Full-Stack Engineer @ iEnroll

September 2025 – March 2026

San Francisco Bay Area (Remote)

- Modernized enrollment, admin, customer, and reporting workflows working across design, UX, on-call bug fixes, and product development lifecycle
- Developed an automated emailing system with template-based editing for non-coders to create emails
- Created internal tools for non-technical staff for database management scoped to Read/Update operations
- AI-native code cycle

Product Manager & Full-Stack Engineer @ CookShare

January 2026 – Present

San Francisco Bay Area (Remote)

- Led the software creation for a new customer marketplace for a scheduled drop-oriented platform for ethnic food
- Integrated Slack for team coordination and prototyped the OpenClaw App for AI-assisted workflow automation using MCP tool calls and subagent orchestration
- Owned a product development cycle for customer interviews, production release, and hot-fixing bugs post-release
- Handled customer support tickets and bug fixes with a response time of 2 hours or less
- Launched a multi-tenant vendor platform for food vendors to upload menus onto a marketplace
- Created new logo and design concepts from scratch

Business Development Intern @ PT. Mersifarma Tirmaku Mercusana

May 2024 – July 2024

Jakarta, Indonesia

- Evaluated ERP product fits across Odoo, NetSuite, and Microsoft Dynamics—analyzing total cost of ownership, integration complexity, and process gaps for a pharmaceutical manufacturing operation
- Mapped end-to-end data flows between R&D, QA, General Affairs, and Purchasing; produced a domain model identifying redundant handoffs and data integration bottlenecks, directly informing technical system design recommendations

Software QA Engineer Intern @ Finitive

June 2022 – March 2023

New York, NY

- Designed and executed test plans for a fintech lending platform, identifying defects across API integrations and loan origination flows
- Built regression test suites and maintained QA documentation across release cycles

PROJECTS

Ekxixi AI — Knowledge Graph Worldbuilding Studio

February 2026

React · TypeScript · Gemini · Firestore · GCP

- Shipped an AI-native knowledge graph studio in 13 days—designed a labeled property graph with 10 node categories, 7 edge types including reified hyperedges, and a temporal dimension system for time-aware entity snapshots
- Built a 13-tool MCP server in TypeScript with a custom Zod-to-Gemini FunctionDeclaration schema bridge and multi-turn agentic function-calling loop with REPL-style graph navigation
- Implemented a weighted ContextAssemblyService that ranks and assembles a token-budget-aware context from graph nodes—replacing naive full-context dumps with a precision-scored subset
- Deployed on Google Cloud Run + Firebase Auth/Firestore with a three-tier AI fallback chain: local Ollama → backend proxy → direct Gemini API

SKILLS

Languages: TypeScript, Python, SQL, Bash

Frontend: React, Next.js, Vite, Tailwind CSS, shadcn/ui, React Query, Framer Motion

Backend & APIs: Node.js, Express, Django/DRF, RESTful APIs, JWT/OAuth, Multi-Tenancy

AI & Automation: MCP, Agentic Workflows, Gemini API, Knowledge Graphs, Slack Integrations

Infrastructure: GCP, Docker, PostgreSQL, Redis, Firebase, CI/CD, GitLab CI, Cloud Build

Practices: Git, Agile, System Design, Test-Driven Development

EDUCATION

B.A. Economics & B.S. Data Science @ New York University & NYU Shanghai

August 2021 – May 2025

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Machine Learning, Statistical Modeling & Econometrics, Linear Algebra, Probability Theory, Data Engineering
